

75

Sweeper

DULEVO

FAYAT GROUP

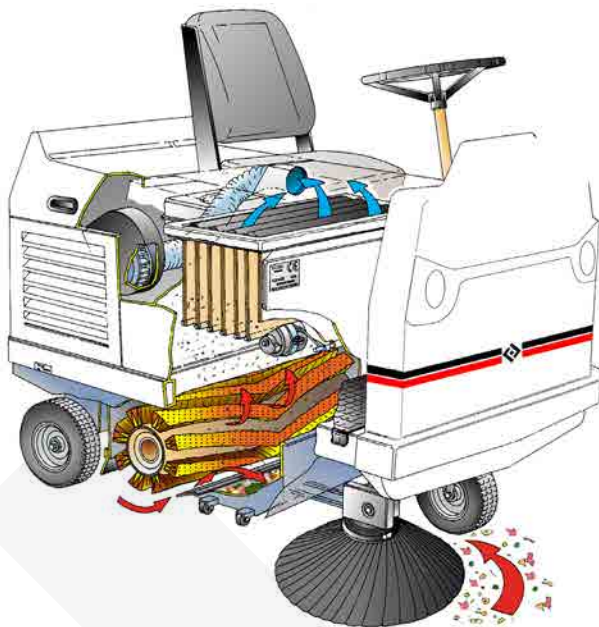

TIMELESS QUALITY THROUGH PASSION

The Dulevo 75 sweeper is the smallest, “man-on-board” Dulevo. A compact machine, designed for small spaces but which can also tackle very large surfaces, always guaranteeing maximum comfort for the operator and that perfection of results that can only be ensured by the Dulevo direct front collection system.

Comfort and functionality

The perfect visibility offered to the operator, the ergonomic and intuitive controls, the adjustable seat and the compact design of the sweeper make the 75 extremely manoeuvrable, perfect even for cleaning the most congested areas. The wide access to the engine compartment allows easy identification of the various parts and simplifies maintenance.

Collection system

It collects all types of debris, from the finest dust to the heaviest and most voluminous debris. The positioning of the waste container guarantees excellent results even with the brush almost completely worn out. The floating central brush, which can be operated directly from the driver’s seat, not only optimises the sweeping effect on all types of surfaces, but also increases the brush’s service life.

Filter system

Designed to retain the finest dust, it makes the machine ideal for use in environments with high dust concentrations. Thanks to its special “bag” shape, it offers maximum filtering surface area with minimum space requirements, thus reducing the time needed to shake the filter itself.

Environment

The bag filter system retains all dust, even the finest. Only clean air is released into the environment, and respect for the environment is also ensured by the electric or petrol engines with LPG system. In addition to the high-quality filter fitted as standard, the man-on-board Dulevo 75 sweeper can be equipped with the FPTE membrane filter system, which offers even higher performance.

The Dulevo 75 in brief:

- 2-year warranty;
- Extremely robust chassis;
- The waste container, which can be pulled out to the side, is characterized by its large capacity and manoeuvrability, which is ensured by 4 castors and a convenient tow handle;
- Tool-free centre brush change;
- On-board battery charger (EH);
- Hydraulic transmission;
- Shock-proof side brush;
- Air-cooled motors (SH).

Technical data		75EH	75SH
Power supply		Battery 24V	Petrol/LPG
Cleaning path:			
- With central brush	mm	700	
- With central and right brush	mm	950	
- With central, right and left brush	mm	1.200	
Waste container capacity	L	85	
Cleaning capacity	m ² /h	7.200	
PM10 certification		PM 2,5/PM10****	
Maximum speed	km/h	6	
Length x width x height	mm	1.453 x 906 x 12.85	

Applications*. A wide range of options and accessories, completing its features, places the 75 at the highest level for versatility and ductility.

- Left side brush unit
- Right side brush casing
- Left side brush casing
- Overhead roof
- LED front lighting system
- Rubber perimeter bumper
- Filter with PTFE membrane.
- Superelastic wheels
- LPG system (bottle not included)
